

## Eurener reaffirms its global commitment to sustainability and receives EcoVadis' highest distinction

Eurener, a European manufacturer of photovoltaic modules with over 25 years' experience, has received the prestigious EcoVadis Platinum Medal for the second consecutive year. **This recognition places Eurener among the top 1% of the most sustainable companies assessed globally.**

EcoVadis, one of the world's leading corporate sustainability rating platforms, has once again recognised Eurener's strong performance in areas such as the environment, labour practices, human rights, and ethics. This distinction, the highest awarded by EcoVadis, reflects Eurener's ongoing dedication to corporate social responsibility, the circular economy, and decarbonisation.

*"This recognition reinforces our vision of a more ethical, responsible and transparent PV industry. We don't just manufacture high-efficiency solar modules; we also promote a business model that aligns with the highest global sustainability standards",* says Pasquale Zazo, Eurener's Commercial Director.

The EcoVadis Platinum Medal is awarded exclusively to organisations that achieve scores above the 99th percentile following a rigorous evaluation process based on international criteria, including those of the United Nations Global Compact, the International Labour Organisation (ILO), and the Global Reporting Initiative (GRI).

This recognition comes at a time when the demand for clean energy is accompanied by a growing demand for the sustainability of the entire supply chain — an area in which Eurener is recognised as a European leader.
